Dŵr Uisce

Energy Recovery in Water Services
Adennill Ynni yn y Diwydiant Dŵr

NEWSLETTER

Autumn/Winter 2017

Welcome/Croeso

Welcome to our Autumn 2017 newsletter bringing you up to date on the Dŵr Uisce project. It has been a busy summer and an even busier autumn. In this edition, we are highlighting the creation of the smart specialization cluster - otherwise known as the learning network - which is emerging in the project. As we have said on many occasions, there is a network of pipes under the ground from which we are recovering energy; there is a complementary network of organizations over the ground that needs to interact and to collaborate in order to exploit this opportunity. So, we look behind and beyond this aspect of the project.

Strong evidence of the cluster was there for all to see in Bangor University where, on the 27th of October 2017, we came together for the first [Dŵr Uisce Annual Conference](#). It was a great event and sets us up well for the next phase of the project.

Croeso i'n cylchlythyr hydref 2017 sy'n rhoi'r wybodaeth ddiweddaraf i chi ar brosiect Dŵr Uisce ar ôl cyfnod prysur. Yn y rhifyn hwn, yr ydym yn tynnu sylw at greu clwstwr arbenigo craff - neu fe ellir ei alw'n rhwydwaith dysgu - sy'n tyfu o fewn y prosiect. Fel yr ydym wedi dweud eisoes, rydym yn adennill ynni o rwydwaith o bibellau dŵr tanddaearol; ond mae yna rwydwaith o sefydliadau cyflenwol sydd angen rhyngweithio a chydweithio er mwyn manteisio ar y cyfle hwn. Roedd tystiolaeth gref o'r clwstwr hwnnw i bawb ei weld ym Mhrifysgol Bangor lle, ar 27 Hydref 2017, daethom at ei gilydd ar gyfer [Cynhadledd Flynnyddol Dŵr Uisce](#) cyntaf. Roedd yn ddigwyddiad buddiol iawn ac yn ein harwain yn glir at gam nesa'r prosiect.

Paul Coughlan

SUMMARY - DŴR UISCE CONFERENCE 2017

['Sustainability in Energy and Water Resources: Research & Practice'](#)

Friday 27th October 2017, Bangor University, Wales
